

# SPELL IT OUT

### How to play the game

1. Choose a number of words you would like your child to learn or use the words given at school for their spelling test.
2. Write each word on a strip of paper and put it face down on the table
3. Write the same words on a piece of paper for a list reference.
4. The youngest player rolls a dice and moves the number of steps.
5. If the player lands on a question space, the player reads it out aloud, the other player picks a word from the table and answers the question. The player should consult the word list and answer the question by spelling the word. If the player guesses right he/she can move to the next letter space. The turn is over.
6. If the player lands on the space with a letter on it, the other player chooses a word from the word list and the player has to spell it out loud (without checking the list). If misspelled the player moves backwards to the closest letter.
